PROFILE

Full-stack software engineer with 5+ years building production web, desktop and mobile systems for logistics, retail and e-commerce. I design REST APIs in Laravel and Node.js, build React and Next.js front ends, and run the servers they deploy to. Promoted to Senior Software Engineer in 2025; I lead a three-person team on an offline-first POS and run my own live booking platform, BookSpot.

EXPERIENCE

Imara Software Solutions — Puttalam, Sri Lanka

Senior Software Engineer — **Sep 2025 – Present**

- Lead a three-developer team on POSMate; own the Git workflow, code reviews, production servers and 50+ shipped releases.
- Lead and solely maintain ClickReport, a WordPress reporting platform with 100+ report templates.
- Deploy and maintain production servers on AWS and DigitalOcean; mentor junior developers.

Software Developer — **Mar 2021 – Sep 2025**

- Took over Dinodio from its original developer and delivered phases 1–5 across front end and backend.
- Built Laravel and Node.js REST APIs integrating FedEx, UPS, DHL, eBay and PayPal.
- Implemented JWT and OAuth 2.0 authentication with role-based access control; wrote PHPUnit tests.
- Built React and Next.js interfaces, an Electron desktop client, and React Native and Flutter apps.

SELECTED PROJECTS

POSMate · Offline-first retail POS · lead developer, team of 3 — posmate.horixpro.com · github.com/horixpro-dev/posmate-releases

React, TypeScript, Electron, Zustand, IndexedDB (Dexie), SQLite, Laravel, Flutter

- Desktop client works fully offline: IndexedDB/SQLite cache, queued requests with retry, background sync and JWT auto-refresh.
- Laravel APIs for sales, purchasing, variants, multi-currency and stock alerts; a Flutter app handles barcode scanning and mobile sales.

Dinodio · Multi-carrier shipping platform · phases 1–5, full stack — dinodio.com

Next.js, Node.js, Express, MySQL, PostgreSQL

- Built carrier comparison, multi-step booking, pickup scheduling and tracking on FedEx, UPS, DHL and Upela APIs.
- Added label printing, PayPal payments, wallet records, support tickets and admin shipment management.

BookSpot · Venue and service booking platform · own product, lead developer — bookspot.lk

Laravel 12, MySQL, Tailwind CSS, Alpine.js

- Live booking marketplace for halls, pools, photographers and car rentals in Sri Lanka; I lead development with one co-developer and run the hosting.
- Four roles (customer, vendor, staff, super admin) on a 150+ endpoint REST API: time-slot holds, bank-transfer payments with vendor confirmation, refunds, tickets and push notifications.
- Covered it with 700+ PHPUnit tests and Playwright browser tests; set up GitHub Actions CI with automatic deployment to production.

DropifyPro · eBay seller-operations platform

Laravel, Blade, MySQL, eBay API

- Built seller dashboards (revenue, profit, wallet, sales charts), eBay account linking, product and variant inventory, orders, memberships and admin import/revision logs.

Also: Virtual Study Assistant, AI study app with React Native, Express and DeepSeek (github.com/abdhakeem18/VirtualStudyAssistant) · eBay Motors listing automation (Laravel, eBay API, AWS) · TradeWay (freelance: React web, Node.js API, React Native app) · ERPNext LMS customisation
